Assignment 4: Team project

Responsibilities: Pacman and Wall code

Pacman.cs

int x
int y
int lives
int score
float speed;
int radius,
void update()
~~isPowered~~ powerTime;
void render()
enum direction {none, up, left, down, right}
direction current;
direction desired
void handleMovement()
private tiles[,] tiles;
issues:

render leaves permanent circles. possibly solved by using a texture later?
forgot to clear window

collision: check prior to contact

shrink pacman to avoid getting stuck

pacman sometimes moves in place?
Not sure what to do

Tile.cs

int x;
int y;

enum type: wall, pellet, powerPellet, food, ghostWall, portal
bool destroy;

void collide(Pacman pacman);

Portal omitted for time sake
